Cookie Policy

Codejig Limited uses cookies and such popular information-gathering tool as Google Analytics for a number of reasons, including for delivering a better customer experience, improving rendered services, analyzing how the Website is used for providing access to Codejig Services. Also, since several videos from Codejig Limited's Youtube channel are embedded in the Website, Youtube cookies are placed on your device once you watch any video on Codejig Website. We would like to specifically emphasize that Codejig Limited has no control over Youtube cookies and ways how your information collected through Youtube cookies is used, retained, processed and shared by Google.

What is a cookie?

Cookie is a piece of data sent to your web browser that enables Codejig Limited to provide you with certain features and functions on Codejig Website and in the Software. Google Analytics also functions by implementing cookies that allow this tool to collect information about how you use Codejig Website. Cookies used by Google Analytics will be referred to in this Policy as third-party cookies.

What types of cookies does Codejig Limited use?

● **Strictly necessary cookies**

Strictly necessary cookies are crucial for functioning of Codejig Services, for example, they enable you to stay logged in while you use the Services and avoid the need to re-enter your credentials each time you visit a new web page within the Services. If they are turned off, you will be unable to access and use Codejig Services. In particular, we send to your device JSESSIONID cookie. It is a session cookie, which expires when you close your browser, used for session management.

● **Third-party cookies**

We use third-party cookies implemented by Google Analytics to get analytical insights on how our Website is accessed and used.

Aside from the approximate location (IP address), the information collected by Google Analytics is mostly anonymous traffic data including browser information, device information, language, time of visit, pages visited, time spent on each page of the webpages, and the URI you came through to arrive at the Website. Google Analytics does not personally identify you, it only collects data about how you use the Website. In particular, the following third-party cookies are used:

Cookie Name	Description	Expiration
_ga	Google Analytics cookie. It is used to distinguish users.	2 years
_gid	Google Analytics cookie. It is used to distinguish users.	24 hours
_gat_gtag_[ID of website]	Google Analytics cookie. It is used for tracking visits.	2 years

Also, third-party Youtube cookies are placed on your device when you watch Codejig Limited's Youtube videos that are embedded in the Website. Since the privacy-enhanced mode is enabled for those videos, Youtube does not drop any cookies and does not collect information about your usage behaviour unless you play a video. For more information about the privacy-enhanced mode, please get acquainted with this YouTube Help article.

However, once you watch an embedded Youtube video, the following cookies are set:

Cookie Name	Description	Expiration
VISITOR_INFO1_LIVE	It is used by Youtube for determining your bandwidth on web pages with embedded Youtube videos.	179 days
PREF	It is used for registering an ID number that enables Google to analyze how Youtube videos are used across different websites.	8 months
GPS	It is used for registering an ID number on mobile devices to GPS track the device based on its geographical location.	Expires when you close your browser.
YSC	It is used for registering an ID number to keep statistics of what videos from YouTube you have watched.	Expires when you close your browser.

We have no control over Youtube cookies since they are set by the website itself.

Please review [Google Privacy Policy](#) to understand why and how Google collects and shares your data.

What opt-out options do you have?

You can control how Codejig Limited uses cookies by disabling cookies sent by Google Analytics, but you cannot opt-out of strictly necessary cookies since they are crucial for Services to function properly. Codejig Limited does not provide you with built-in opt-out options for those cookies and you are not recommended to disable them by adjusting your browser's settings since this action will affect your ability to use Services.

How to Control Google Analytics

If you want to stop the Website collecting data about your website usage via Google Analytics, you can:

1. Disable cookies in your browser
2. Disable Javascript in your browser
3. Use Google's Opt-out browser add-on
4. Use a third-party tool such as Disconnect, Ghostery or Do Not Track Me

The first two options will affect your online experience (some functionality and features may not work).

Contact us

If you have questions or comments about this Cookie Policy or regarding how your information is used, please contact us. We appreciate your feedback and comments.

Via Email. If you have questions or complaints regarding our Cookie Policy or security practices, please contact us by email at privacy@codejig.com. We will respond to questions or concerns within 30 days.
